FLAKE

Unique ID: PUBLIC-F30932

Object type certainty: Certain

Workflow status: Awaiting validation

A thin flake of mottled grey and grey brown pebble flint. Cortex backs the left side and the distal end has been truncated straight. The sharp right margin truncates a feathered dorsal scar. This leaves a wavy and sharp edge. There is a little fine retouch near the proximal end and in the mesal part of the lateral margin. Mercer(1981) illustrates an edged, truncated flake on page 143, fig 63, L194.

Subsequent actions

Current location of find: Royal Cornwall Museum

Subsequent action after recording: Donated to a museum

Chronology

Broad period: NEOLITHIC Subperiod from: Early Period from: NEOLITHIC Subperiod to: Early Period to: BRONZE AGE Date from: Circa 4500 BC Date to: Circa 1500 BC

Dimensions and weight

Quantity: 1

Length: 33.6 mm Width: 19.7 mm Thickness: 4.6 mm Weight: 2.5 g

Discovery dates

Date(s) of discovery: Thursday 1st April 2004 - Friday 30th April 2004
