

# POINT

**Unique ID:** NLM-913B21

Object type certainty: Certain

Workflow status: Awaiting validation

Grey flint point. A thin sub-triangular flake with broad flakes struck from its dorsal side and with a flat ventral surface with a small bulb at one corner. Angled scalar retouch executed from the dorsal aspect follows one straight edge, perhaps to form a cutting edge. White patina then developed over all struck surfaces, to be interrupted by a limited zone of short abrupt retouch executed from the ventral aspect which follows that edge opposite the earlier putative cutting edge. Suggested date: Neolithic, 4000-2350 BC

Length: 42.9mm, Width: 31.6mm, Thickness: 7.9mm, Weight: 10.24gms

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: NEOLITHIC

Period from: NEOLITHIC

Period to: NEOLITHIC

Date from: Circa 4000 BC

Date to: Circa 2350 BC

## Dimensions and weight

Quantity: 1

Length: 42.9 mm

Width: 31.6 mm

Thickness: 7.9 mm

Weight: 10.24 g

## Discovery dates

Date(s) of discovery: Thursday 14th October 2021

## Personal details

This information is restricted for your access level.

## Other reference numbers

Other reference: NLM48111

## **Materials and construction**

Primary material: Flint

Manufacture method: Knapped/flaked

Completeness: Complete

## **Spatial metadata**

Region: [East Midlands](#) (European Region)

County or Unitary authority: [Lincolnshire](#) (County)

District: [West Lindsey](#) (District)

To be known as: Swinhope

## **Spatial coordinates**

Grid reference source: GPS (from the finder)

Unmasked grid reference accurate to a 1 metre square.

## **Discovery metadata**

Method of discovery: Fieldwalking

General landuse: Cultivated land
