

# SHOT

**Unique ID:** DEV-0CF913

Object type certainty: Certain

Workflow status: Awaiting validation

An assemblage of eight post medieval musket balls and smaller shot dating to c. AD 1600-1700.

One larger musket ball appears to have been fired, with a compression and irregularity in its surface. The remainder appear unfired. They range in size from 17.9mm to 10.1mm in diameter and 35 to 5.7g in weight. The smallest shot may have been intended for handguns or pistols while the larger shot could have been used in muskets although their weight is slightly short. Foard (2008) does, however, point out that smaller shot would have been effective in larger bore weapons and that an irregular sized selection of shot is characteristic of a possible Civil War site.

**Measurements:** combined weight 148g.

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Period to: POST MEDIEVAL

Date from: Circa AD 1600

Date to: Circa AD 1700

## Dimensions and weight

Quantity: 8

Weight: 148 g

## Discovery dates

Date(s) of discovery: Tuesday 1st June 2021 - Saturday 4th September 2021

## Personal details
