

SEAL

Unique ID: LANCUM-F4CE42

Object type certainty: Certain

Workflow status: Awaiting validation

Lead seal, possibly originating from a bale of heckled flax from St Petersburg in Russia. These seals were attached to the bales that were imported into Britain and were eventually thrown out with the woody part of the stem to be mixed with night soil removed from the openb streets or with manure and sold to local farmers as fertiliser or to treat the land.

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Date from: AD 1849

Dimensions and weight

Quantity: 1

Thickness: 4 mm

Weight: 18.06 g

Diameter: 35 mm

Discovery dates

Date(s) of discovery: Saturday 1st January 2005

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Lead

Manufacture method: Cast

Spatial metadata

Region: [North West](#) (European Region)

County or Unitary authority: [Lancashire](#) (County)

District: [Wyre](#) (District)

To be known as: Nateby

Spatial coordinates

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.
