## TOKEN

Unique ID: SUSS-25A726
Object type certainty: Certain
Workflow status: Awaiting validation
A cast lead token. The token is flat and circular, but the obverse design is extremely irregular. The edges of the token have been rolled (seen on the reverse). The obverse of the token depicts two large irregular lines, set parallel to each other. A small high relief line is set parallel to these two (approximately 3 mm away from the pair). Running below all three lines is a low relief line which forms a basic cross-hatched pattern. The reverse is blank. The lead has gone a dark silvery-grey colour. Due to a lack of excavated examples these tokens can only be loosely dated from between circa 1250-1850 AD.

## Subsequent actions

Current location of find: Returned to landowner - for local display Subsequent action after recording: Returned to Landowner

## Chronology

Broad period: MEDIEVAL
Subperiod from: Middle
Period from: MEDIEVAL
Subperiod to: Late
Period to: POST MEDIEVAL
Date from: Circa AD 1250
Date to: Circa AD 1850

## Dimensions and weight

Quantity: 1
Thickness: 4.49 mm
Weight: 7.8 g
Diameter: 18.9 mm

## Discovery dates

Date(s) of discovery: Thursday 1st January 2004

## Personal details

This information is restricted for your access level.

## Materials and construction

Primary material: Lead
Manufacture method: Cast

## Spatial metadata

Region: South East (European Region)
County or Unitary authority: East Sussex (County)
District: Wealden (District)
To be known as: East Dean and Friston

## Spatial coordinates

Grid reference source: Centred on village (which isn't a parish) Unmasked grid reference accurate to a 0.01 metre square.

## Discovery metadata

Method of discovery: Metal detector
Current location: Returned to landowner - for local display
General landuse: Cultivated land
Specific landuse: Character undetermined
