## MICROLITH

Unique ID: NMGW1116
Object type certainty: Certain
Workflow status: Published
Three later Mesolithic flint microliths. Two are of straight-backed form and 'narrow-blade' type; whilst the third is lanceolate, being retouched along both lengths to a point.

## Notes:

Examination of the microliths reveals that two retain their bulbs of percussion, which would not be the case hd they been manufactured using the microburin technique. A complete absence of microburins from the assemblagesuggests that this technique was not used at Porth-gain. Further interpretive notes on the Porth-gain assemblage are held by the Department of Archaeology \& Numismatics, National Museum \& Gallery Cardiff.

Class: Later mesolithic microlith

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: MESOLITHIC
Subperiod from: Late
Period from: MESOLITHIC
Date from: 10000 BC
Dimensions and weight
Quantity: 3

## Discovery dates

Date(s) of discovery: Tuesday 1st August 2000

## Personal details

This information is restricted for your access level.

## Other reference numbers

Other reference: NMGWPA:2000.128.1224-1226

## Materials and construction

Primary material: Flint
Manufacture method: Knapped/flaked

## Spatial metadata

Region: Wales (European Region)
County or Unitary authority: Pembrokeshire (Unitary Authority)
District: Pembrokeshire (Unitary Authority)
Parish or ward: Llanrhian (Community)

## Spatial coordinates

4 Figure: SM8132
Four figure Latitude: 51.943281
Four figure longitude: -5.187753
1:25K map: SM8132
1:10K map: SM83SW
Grid reference source: Centred on field
Unmasked grid reference accurate to a 1000 metre square.

## Discovery metadata

Method of discovery: Fieldwalking
General landuse: Cultivated land
Specific landuse: Character undetermined
