# **SKILLET**

Unique ID: HAMP-9C9664

Object type certainty: Probably Workflow status: Awaiting validation

A curved cast copper-alloy fragment probably from the handle of a medieval vessel, most likely a skillet. The fragment has a semicircular cross-section. Viewed in plan one can see that it tapers slightly from a maximum width of 20.1mm to 19.0mm. The uppermost, widest face is decorated with an incised ring-and-dot design. This design can be seen in an example which can be found illustrated in Margeson (1993, 90; ref. 562) which was found in an early 16th-century context but is likely to date from the previous couple of centuries. The fragment has corroded to a dull grey-green colour, but is far more black on its lower surface.

Class: handle

### **Subsequent actions**

Subsequent action after recording: Returned to finder

## Chronology

Broad period: MEDIEVAL Period from: MEDIEVAL Date from: Circa AD 1300 Date to: Circa AD 1500

## **Dimensions and weight**

Quantity: 1 Length: 33.9 mm Width: 20.1 mm Thickness: 6.7 mm Weight: 25.225 g

## **Discovery dates**

Date(s) of discovery: Saturday 30th June 2007 - Wednesday 25th July 2007

### **Personal details**
