

WEIGHT

Unique ID: YORYM-AEBD01

Object type certainty: Certain

Workflow status: Awaiting validation

A small weight made of lead. The weight is triangular, with rounded corners, and it is flat. The weight is undecorated. The lead has gone a light greyish-white colour. Some damage has occurred to the weight as a result of being hit by the plough, as several scratches and scars are evident on the surface of the weight. This weight is possibly medieval, but most probably post-medieval in date. Due to that fact that so few lead weights have been found in archaeological contexts, only a very broad date range can be allocated.

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: MEDIEVAL

Subperiod from: Early

Period from: MEDIEVAL

Subperiod to: Late

Period to: POST MEDIEVAL

Date from: Circa AD 1250

Date to: Circa AD 1850

Dimensions and weight

Quantity: 1

Length: 32.1 mm

Width: 27.4 mm

Thickness: 4.3 mm

Weight: 22.2 g

Discovery dates

Date(s) of discovery: Thursday 1st November 2007

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Lead

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [Yorkshire and the Humber](#) (European Region)

County or Unitary authority: [York](#) (Unitary Authority)

District: [York](#) (Unitary Authority)

To be known as: Naburn

Spatial coordinates

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land

Specific landuse: Character undetermined
