

QUERN

Unique ID: SF6253

Object type certainty: Certain

Workflow status: Published

Fragment of a lava quern. Maximum 24mm thick. Grooved on both faces - intervals c. 8mm on one face, 12mm on the other. Unusually thin for a Roman quern so more likely medieval - but these not usually dressed on both faces.

Notes:

This record was created before the Portable Antiquities Scheme began using the Central Database. We are aware that this record may fall below our usual standards of recording, and we are working to rectify this.

Chronology

Broad period: MEDIEVAL

Period from: MEDIEVAL

Date from: AD 1066

Date to: AD 1540

Dimensions and weight

Quantity: 1

Length: 82 mm

Thickness: 24 mm

Discovery dates

Date(s) of discovery: Friday 1st December 2000

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Igneous rock

Completeness: Fragment

Spatial metadata

Region: [Eastern](#) (European Region)

County or Unitary authority: [Suffolk](#) (County)

District: [Mid Suffolk](#) (District)

To be known as: SUFFOLK STUSTON

Spatial coordinates

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Chance find during metal detecting

General landuse: Cultivated land

Specific landuse: Character undetermined
