VESSEL

Unique ID: YORYM-954C63

Object type certainty: Certain

Workflow status: Awaiting validation

A large lead pot repair. The object is formed from a solid disc of lead which has been shaped around the hole in a ceramic pot. Remains of ceramic material can be seen on the edges of the mend. Is it possible that this mend was used to repair a Roman vessel, in the medieval period. As they were most commonly used in the medieval period.

Chronology

Broad period: ROMAN Period from: ROMAN Subperiod to: Late Period to: MEDIEVAL Date from: Circa AD 43 Date to: Circa AD 1500

Dimensions and weight

Quantity: 1

Length: 74.7 mm Width: 57.1 mm Thickness: 14.7 mm Weight: 227 g

Discovery dates

Date(s) of discovery: Tuesday 1st January 2008

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Lead

Secondary material: Ceramic Manufacture method: Cast Completeness: Complete

Spatial metadata

Region: Yorkshire and the Humber (European Region)

County or Unitary authority: <u>East Riding of Yorkshire</u> (Unitary Authority)

District: **East Riding of Yorkshire** (Unitary Authority)

To be known as: Molescroft

Spatial coordinates

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector General landuse: Cultivated land

Specific landuse: Character undetermined
