BROOCH

Unique ID: LIN-F11647

Object type certainty: Possibly

Workflow status: Awaiting validation

Possible fragment of an iron Hod Hill brooch. The fragment is very corroded and so a certain identification is not possible, however the object is in the shape of an early Roman Hod Hill brooch, having a flat rectangular body with the remains of what appear to be circular side-knops. The 'foot' is triangular in plan, flat and has a ?circular terminal.

Class: Hod Hill

Chronology

Broad period: ROMAN Subperiod from: Early Period from: ROMAN Date from: Circa AD 50 Date to: Circa AD 70

Dimensions and weight

Quantity: 1 Length: 23 mm Width: 12 mm Thickness: 2 mm
