

STRAP FITTING

Unique ID: YORYM-0EE820

Object type certainty: Certain

Workflow status: Awaiting validation

A hollow copper alloy lace chape, strap fitting or possible ferrule from the end of a wooden brush or pen, dating to the 14th to 16th Century. The chape has been formed from a rolled, cylinder of sheet copper alloy, there is no joint in the cylinder. The chape has a wide open end, then tapers to the terminal which is rounded. There are two punched holes in the sides of the chape.

Chronology

Broad period: MEDIEVAL

Subperiod from: Early

Period from: MEDIEVAL

Subperiod to: Early

Period to: POST MEDIEVAL

Date from: Circa AD 1300

Date to: Circa AD 1650

Dimensions and weight

Quantity: 1

Length: 21.9 mm

Width: 5.7 mm

Thickness: 1.8 mm

Weight: 0.9 g

Discovery dates

Date(s) of discovery: Wednesday 1st October 2008

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [Yorkshire and the Humber](#) (European Region)

County or Unitary authority: [York](#) (Unitary Authority)

District: [York](#) (Unitary Authority)

To be known as: Deighton

Spatial coordinates

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land

Specific landuse: Character undetermined
