

TOKEN

Unique ID: SUSS-5DEC82

Object type certainty: Certain

Workflow status: Awaiting validation

Cast lead circular uniface token. The token has a raised design of the capital letters J I with a pellet between on one side. The reverse is blank. The token is 15.3mm in diameter, 1.6mm thick and weighs 3.01grams. Lead tokens had a wide variety of uses and were made locally, they are therefore hard to date precisely but those with initials are thought to date c.1500-1850 AD.

Notes:

Part of a group of tokens of various designs found close together including three tokens with the same design.

Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Date from: Circa AD 1500

Date to: Circa AD 1850

Dimensions and weight

Quantity: 1

Thickness: 1.6 mm

Weight: 3.01 g

Diameter: 15.3 mm

Discovery dates

Date(s) of discovery: Monday 18th May 2009

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Lead

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [South East](#) (European Region)

County or Unitary authority: [East Sussex](#) (County)

District: [Wealden](#) (District)

To be known as: Wartling

Spatial coordinates

Grid reference source: GPS (from the finder)

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land

Specific landuse: Character undetermined
