END SCRAPER

Unique ID: BERK-057F02

Object type certainty: Certain Workflow status: Published

A retouched secondary flake, possibly a horseshoe scraper with retouch visible on both the dorsal and ventral sides. The tool appears to have battered edges all around it. The flint is a brown-grey in colour and the bud is still present on the ventral surface, although it has been partially removed by retouch. This tool measures 30.20mm long, 20.87mm wide and is 8.12mm thick. It weighs 6.9gms.

Notes:

This scraper is part of a small assemblage that dates from the late Mesolithic to Neolithic period.

Class: possibly Horseshoe

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: MESOLITHIC
