STRAP FITTING

Unique ID: LVPL-1CB458

Object type certainty: Certain Workflow status: Published

Fragment of a cast copper alloy strap fitting of Roman date, c.200-300. All that remains of the fitting is an oval boss with single central deep median groove in a stylised representation of the female vulva. These types of boss are usually found attached to a hexagonal shaped integral back plate with studs or rivets on the back for attachment. See LIN-38A654 for example. These type of strap fittings are normally classed as military belt fittings and are commonly dated to the third century. Find recorded from images supplied by North West MDC. Unfortunately no measurements recorded.
