

TOKEN

Unique ID: SUSS-180832

Object type certainty: Certain

Workflow status: Awaiting validation

Post Medieval cast lead alloy circular uni-faced token. On one side are raised initials, with a T on the left and another letter, probably I or P at an angle to it on the right. The reverse is blank. The token measures 21.3mm in diameter, 2.8mm thick and weighs 7.28 grams. Lead tokens had a wide variety of uses and were made locally; they are therefore hard to date precisely but those with initials are thought to be Post Medieval in date (1500-1850 AD).

Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Date from: Circa AD 1500

Date to: AD 1850

Dimensions and weight

Quantity: 1

Thickness: 2.8 mm

Weight: 7.28 g

Diameter: 21.3 mm

Discovery dates

Date(s) of discovery: Saturday 5th December 2009

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Lead Alloy

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [South East](#) (European Region)

County or Unitary authority: [East Sussex](#) (County)

District: [Wealden](#) (District)

To be known as: Walbleton

Spatial coordinates

Grid reference source: GPS (from the finder)

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land
