QUERN

Unique ID: SF-D29141

Object type certainty: Certain Workflow status: Awaiting validation

A fragment of grey lava quern stone of possible Roman or later date, possibly imported from the Rhine. Part of one edge is preserved, with a flattened grinding surface and rounded exterior edge. It measures 83.41mm in width, 54.19mm in length, 16.79mm in thickness, and weighs 110.01g. This quern is possibly of Roman date given the associated finds from the site, although a later date cannot immediately be ruled out.

Chronology

Broad period: ROMAN Period from: ROMAN Period to: ROMAN

Dimensions and weight

Quantity: 1 Length: 54.19 mm Width: 83.41 mm Thickness: 16.79 mm Weight: 110.01 g

Discovery dates

Date(s) of discovery: Tuesday 1st December 2009
