

VESSEL

Unique ID: SF9100

Object type certainty: Certain

Workflow status: Published

Cast copper-alloy leg from a cooking vessel, now incomplete. The top survives, with a smooth curved surface which could be soldered to the body of the vessel. The reverse is flat, but the front is lumpy and it is hard to see any deliberate design features. There is some sooting on all surfaces including the top. The break is old and worn.

Class: cooking vessel **Sub class:** leg

Chronology

Broad period: MEDIEVAL

Period from: MEDIEVAL

Subperiod to: Early

Period to: POST MEDIEVAL

Date from: AD 1250

Date to: AD 1600

Dimensions and weight

Quantity: 1

Length: 46 mm

Width: 48 mm

Thickness: 22 mm

Weight: 125.88 g

Discovery dates

Date(s) of discovery: Wednesday 1st August 2001

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy

Completeness: Incomplete

Spatial metadata

Region: [Eastern](#) (European Region)

County or Unitary authority: [Suffolk](#) (County)

District: [Mid Suffolk](#) (District)

To be known as: KENTON

Spatial coordinates

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land

Specific landuse: Character undetermined
