BROOCH

Unique ID: YORYM-5BE8D3

Object type certainty: Certain

Workflow status: Awaiting validation

An incomplete cast copper alloy Trumpet brooch of Roman date. The head, bow, acanthus moulding, catchplate and foot all survive, but the pin mechanism and pin no longer remain. From the reverse of the head the loop which would have held the pin mechanism can be seen. The head is wide and trumpet shaped and is decorated with an incised ring around the edge. From the head the upper bow extends terminating with three very worn collars. Below the collar is a crude acanthus decoration followed by a second set of triple collars. Extending down from the lower collar is the D-shaped sectioned lower bow which is decorated with an incised border and further incised markings. This bow terminates in a circular foot with three collars, one of which is decorated with vertical incised lines. From the reverse of the lower bow the catchplate remains intact, if a little worn. The metal is a mid greenish-brown colour and is very worn. Brooches of this type date from between 75-175 AD. Similar examples can be seen in Hattatt, p.326, fig.185.

Class: Trumpet

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: ROMAN Period from: ROMAN Date from: Circa AD 75 Date to: Circa AD 175

Dimensions and weight

Quantity: 1

Length: 47.9 mm Width: 15.8 mm Weight: 12.2 g

Discovery dates

Date(s) of discovery: Saturday 5th June 2010

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy Manufacture method: Cast

Completeness: Incomplete

Spatial metadata

Region: Yorkshire and the Humber (European Region)

County or Unitary authority: <u>East Riding of Yorkshire</u> (Unitary Authority)

District: East Riding of Yorkshire (Unitary Authority)

To be known as: Near Bridlington

Spatial coordinates

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.
