# **BUCKLE**

Unique ID: SUSS-477142

Object type certainty: Certain

Workflow status: Awaiting validation

Medieval or Post Medieval cast copper alloy double loop buckle frame. The frame has two oval loops which are triangular in section with a flat back and steeply angled inner side and more bevelled outer side. The pin is missing. The buckle has a red brown surface with areas of green corrosion. The frame is 21.6mm long, 17.3mm wide and 2.2mm thick. It weighs 1.81 grams. Such a simple buckle is hard to date precisely, Whitehead (2003) illustrates a similar buckle (page 53, No.294) which he dates to c.1350-1650 AD.

Subsequent action after recording: Returned to finder

## Chronology

Broad period: MEDIEVAL Period from: MEDIEVAL Period to: POST MEDIEVAL Date from: Circa AD 1350 Date to: Circa AD 1650

### **Dimensions and weight**

Quantity: 1 Length: 21.6 mm Width: 17.3 mm Thickness: 2.2 mm Weight: 1.81 g

### **Discovery dates**

Date(s) of discovery: Friday 13th August 2010

#### Personal details

This information is restricted for your access level.

#### **Materials and construction**

Primary material: Copper alloy Manufacture method: Cast Completeness: Incomplete

# **Spatial metadata**

Region: South East (European Region)

County or Unitary authority: West Sussex (County)

District: Arun (District)

To be known as: Warningcamp

# **Spatial coordinates**

Grid reference source: From finder

Unmasked grid reference accurate to a 0.01 metre square.

# **Discovery metadata**

Method of discovery: Metal detector General landuse: Cultivated land

Specific landuse: Character undetermined
