

LITHIC IMPLEMENT

Unique ID: DUR-07AFA3

Object type certainty: Certain

Workflow status: Awaiting validation

Flint implement, probably Neolithic to Bronze Age in date.

The flint is a grey colour with small white and black patches. There are also some patches of the cortex remaining. It is a large core which has had flakes taken off all over, one end has been worked in particular. This end has a sub-rectangular extension with a rounded end and has been worked on all edges. This extension could be used as a tool, perhaps a borer or something similar.

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: NEOLITHIC

Period from: NEOLITHIC

Period to: BRONZE AGE

Date from: Circa 3500 BC

Date to: Circa 1000 BC

Dimensions and weight

Quantity: 1

Length: 65.46 mm

Width: 34.38 mm

Thickness: 26.41 mm

Weight: 69.7 g

Discovery dates

Date(s) of discovery: Tuesday 24th September 2002

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Flint

Manufacture method: Knapped/flaked

Completeness: Uncertain

Spatial metadata

Region: [North East](#) (European Region)

County or Unitary authority: [County Durham](#) (Unitary Authority)

District: [County Durham](#) (Unitary Authority)

To be known as: Witton Gilbert Area

Spatial coordinates

Grid reference source: From finder

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Chance find during metal detecting

General landuse: Cultivated land

Specific landuse: Character undetermined
