

LITHIC IMPLEMENT

Unique ID: PUBLIC-0C29D5

Object type certainty: Certain

Workflow status: Awaiting validation

A light to mid grey flake of flint. The dorsal face has jagged edges with only one possible site of retouch at the proximal edge right margin. The ventral face, exhibits conchoidal waves, although the bulb of percussion does not appear to be present. This appears to be more of a piece of debutage used as a one off tool, rather than deliberately manufactured. Possible soft struck rather than hard on one side.

Subsequent actions

Current location of find: Royal Cornwall Museum

Subsequent action after recording: Donated to a museum

Chronology

Broad period: NEOLITHIC

Period from: NEOLITHIC

Period to: BRONZE AGE

Date from: Circa 2500 BC

Date to: Circa 1500 BC

Dimensions and weight

Quantity: 1

Length: 30.75 mm

Width: 19.87 mm

Thickness: 3.28 mm

Weight: 2.12 g

Discovery dates

Date(s) of discovery: Sunday 1st April 2007 - Monday 30th April 2007

Personal details
