

VESSEL

Unique ID: NMGW-71A711

Object type certainty: Certain

Workflow status: Published

Cast copper alloy cauldron or skillet leg of Medieval date, probably dating from 13th - 16th century. The front of the leg has a prominent central rib and two side ribs near the top of the leg, where the leg joins the vessel. The rear of the leg has two chamfered edges. The interior of the vessel is present at the apex of the leg, which shows ancient breaks around its edge. One half of the front of the leg has been recently cleaned by the finder, the remainder of the leg exhibits heavy carbon deposits as a result of repeated burning, as would be expected on the surface of a cooking vessel.

Class: cooking vessel **Sub class:** leg

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: MEDIEVAL

Period from: MEDIEVAL

Period to: MEDIEVAL

Date from: Circa AD 1200

Date to: Circa AD 1600

Dimensions and weight

Quantity: 1

Length: 64 mm

Width: 51.7 mm

Thickness: 20.6 mm

Weight: 122.7 g

Discovery dates

Date(s) of discovery: Tuesday 1st January 2002

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy

Manufacture method: Cast
