

HARNESS FITTING

Unique ID: HAMP-899B32

Object type certainty: Certain

Workflow status: Published

A complete cast copper-alloy mini terret, dating to the late Iron Age/early Roman periods. The terret is sub-circular in plan, with a flattened attachment side, and is D-shaped in cross section, with a flat lower surface (Int. W.: 13.3mm, L.: 12.2mm, Th.: 3.3mm). The flattened side which would have taken a strap is narrowed and recessed (L.: 9.6mm). It is flanked by knops or collars at the junction with the hoop. The object has corroded to a light-green colour with a dark-green patina where it survives. Similar examples can be found on this database, refs. NMS-032B00, YORYM-6BDBA4.

Class: Terret **Sub class:** Miniature

Chronology

Broad period: IRON AGE

Period from: IRON AGE

Subperiod to: Early

Period to: ROMAN

Date from: Circa 150 BC

Date to: Circa AD 100

Dimensions and weight

Quantity: 1

Length: 21 mm

Width: 19.2 mm

Thickness: 3.3 mm

Weight: 3.34 g

Discovery dates

Date(s) of discovery: Saturday 4th February 2012

Personal details

This information is restricted for your access level.

Other reference numbers

Other reference: E3255

Materials and construction

Primary material: Copper alloy

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [South East](#) (European Region)

County or Unitary authority: [Hampshire](#) (County)

District: [Winchester](#) (District)

To be known as: Upham CP

Spatial coordinates

Grid reference source: Generated from computer mapping software

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land
