A post-Medieval to Modern cast lead or lead alloy circular double-sided token (c. 1500-1850).

The token has raised initial letters on one side: I C and arcs and pellets on the other side.

Diameter: 21.5mm. Weight: 8.09g.

Lead tokens had a wide variety of uses and were made locally, they are therefore hard to date precisely but those with initials are thought to date c. 1500-1850.
