

COIN

Unique ID: SOM-E71DF7

Object type certainty: Certain

Workflow status: Awaiting validation

A Roman copper-alloy nummus of the House of Constantine dating to the period AD 347-348 (Reece Period 17). VICTORIAE DD AVGG QNN reverse type depicting two Victories facing and holding wreaths. Mint unclear.

Notes:

Found at the same time as a hoard of 138 Roman bronze coins placed under a stone (Treasure case 2013 T73a). These coins, found scattered from the rest of the field, appear to be a mixture of Roman copper-alloy denominations dating from across most of the four centuries of Roman rule over Britain.

Age

All are of Roman date and therefore over 300 years old.

Metal content

They are all essentially base metal in composition (copper alloy).

From the same find?

This group of coins has the appearance of an accumulation of losses from different periods over the course of the second to fourth centuries AD. It spans a wider period than is likely for a hoard deposited in, say, the late fourth century and contains a mixture of denominations. The coins were therefore probably not deposited together as a hoard but instead form a series of technically separate finds as a result of random deposition over a period of time. As such, these coins do not appear to constitute Treasure under the stipulations of the *Treasure Act 1996* which require that coins must be from the same find.

Subsequent action after recording: Returned to finder after being declared not Treasure

Treasure details

Treasure case tracking number: 2013T73B

Chronology

Broad period: ROMAN

Period from: ROMAN

Date from: Exactly AD 347

Date to: Exactly AD 348

Dimensions and weight

Quantity: 1
Length: 14.9 mm
Width: 14.5 mm
Thickness: 1.6 mm
Weight: 1.63 g
Diameter: 14.9 mm

Discovery dates

Date(s) of discovery: Sunday 10th February 2013

Personal details

Found by: This information is restricted for your login.
Recorded by: Mr Robert Webley
Identified by: Mr Robert Webley

Other reference numbers

Other reference: SCC receipt 22409
Treasure case number: 2013T73B

Materials and construction

Primary material: Copper alloy
Manufacture method: Struck or hammered
Completeness: Complete

Spatial metadata

Region: [South West](#) (European Region)
County or Unitary authority: [Somerset](#) (County)
District: [South Somerset](#) (District)
To be known as: Somerton CP

Spatial coordinates

Grid reference source: Centred on field
Unmasked grid reference accurate to a 100 metre square.

Discovery metadata

Method of discovery: Metal detector
General landuse: Cultivated land
