BRACELET

Unique ID: SWYOR-6FF3CC

Object type certainty: Certain Workflow status: Published

The bracelet is made of silver wires twisted together to form an open hoop with solid terminals; diameter 65mm; weight, 44.32 grams.

Non-destructive surface metal analysis conducted at the British Museum indicated a silver content of over 99% with traces of gold, lead and copper. The high purity suggests the bracelet is not of European origin, while the regularity of manufacture suggests it is probably made of machine-drawn wire in recent times. It does not therefore qualify as Treasure under the stipulated criteria of the Treasure Act.

B.M. Ager

Curator

Department of Britain, Europe and Prehistory

British Museum

25 March 2015

Notes:

As this object is not 300 years old, it does not meet the requirements of the 1996 Treasure Act.

Subsequent actions

Subsequent action after recording: Returned to finder after being declared not Treasure

Treasure details

Treasure case tracking number: 2014T907

Chronology

Broad period: MODERN Period from: MODERN Period to: MODERN

Date from: Circa AD 1850 Date to: Circa AD 2000

Dimensions and weight

Quantity: 1

Weight: 44.32 g Diameter: 65 mm

Discovery dates

Date(s) of discovery: Sunday 1st September 2013 - Thursday 11th September 2014
