

# BROOCH

**Unique ID:** LANCUM-473D16

Object type certainty: Certain

Workflow status: Published

A badly heat-affected copper alloy Roman brooch, possibly of Headstud type and dating from the late 1st to 2nd century AD. Only part of the bow and the head survives. The bow has a ridge running down the centre, with incised lines either side. The melted condition of the brooch is consistent with its presence in a cremation and makes the positive identification of the brooch type rather problematic.

**Class:** ?Headstud

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: ROMAN

Period from: ROMAN

Date from: Circa AD 60

Date to: Ante AD 200

## Dimensions and weight

Quantity: 1

Length: 29 mm

Weight: 11.51 g

## Discovery dates

Date(s) of discovery: Saturday 1st May 2004

## Personal details

This information is restricted for your access level.

## Materials and construction

Primary material: Copper alloy

Completeness: Incomplete

## Spatial metadata

Region: [North West](#) (European Region)

County or Unitary authority: [Cumbria](#) (County)

District: [Allerdale](#) (District)

To be known as: Beckfoot

## **Spatial coordinates**

Grid reference source: From a paper map

Unmasked grid reference accurate to a 0.01 metre square.

## **Discovery metadata**

Method of discovery: Metal detector

General landuse: Coastland

Specific landuse: Inter-tidal
