CORE

Unique ID: NLM-6EB815

Object type certainty: Certain

Workflow status: Awaiting validation

Mottled grey flint with cortex and with misty patina on one side, core fragment. Flint with broad parallel flakes removed from its dorsal side and with a prominent bulb on the ventral. The ventral surface is lightly patinated whereas the others are not, suggesting this flake was exposed for a period before being reworked. Further parallel flakes are trimmed from a surface meeting that struck dorsal surface described above, which was the striking platform used for that episode. Suggested date: Neolithic, 4000-2350 BC.

Height: 26.4mm, Width: 37.3mm, Thickness: 14.4mm, Weight: 18.31gms.

Evidence of reuse: Interruption of patina by retouch

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: NEOLITHIC Period from: NEOLITHIC Period to: NEOLITHIC Date from: Circa 4000 BC Date to: Circa 2350 BC Period of reuse: NEOLITHIC

Dimensions and weight

Quantity: 1 Height: 26.4 mm

Width: 37.3 mm Thickness: 14.4 mm

Weight: 18.3 g

Discovery dates

Date(s) of discovery: Tuesday 12th May 2015

Personal details

This information is restricted for your access level.

Other reference numbers

Other reference: NLM29619

Materials and construction

Primary material: Flint

Manufacture method: Knapped/flaked

Completeness: Complete

Spatial metadata

Region: East Midlands (European Region)

County or Unitary authority: <u>Lincolnshire</u> (County)

District: West Lindsey (District)
To be known as: Swinhope

Spatial coordinates

Grid reference source: Centred on field

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Fieldwalking General landuse: Cultivated land
