

VESSEL

Unique ID: ESS-9F9226

Object type certainty: Certain

Workflow status: Awaiting validation

A Medieval vessel foot, probably from a tripod ewer, dating AD 1400-1450. The leg is formed to resemble a human leg. It has a sub-triangular sectioned shaft with a rounded projection at about 120 degrees to form the foot. There is a ridge running over the ankle, perhaps imitating a shoe strap. The object has a dark grey patina.

A similar object is published in Egan (1998, no. 459) and is believed to date to the early 15th century.

Dimensions: length: 60.36 mm; width: 14.81 mm; thickness: 20.24 mm; weight: 46.69g.

Class: foot
