

SPOON

Unique ID: NMS-953302

Object type certainty: Certain

Workflow status: Awaiting validation

Fragment of medieval or post-medieval silver spoon. Incomplete handle of slightly flattened hexagonal section with very short triangular moulding on the reverse of the bowl. The surviving shoulders of the bowl are fairly straight and at a narrow angle of slightly less than 90 degrees to each other but not enough survives to suggest a bowl shape. There is a stamped G in low relief on the inside of the bowl at the base of the stem, to be read stem-down. The surface is pitted with beading suggesting it has been partially molten at some point, and has been distorted. Maximum surviving width of bowl 26mm. Maximum surviving length of bowl 23mm. Total surviving length 50mm. Weight 7.45g. Not enough diagnostic features survive to date the spoon closely, and it may be late 15th - 17th century, but is probably 16th - mid-17th century.

Subsequent actions

Subsequent action after recording: Returned to finder after being disclaimed as Treasure

Treasure details

Treasure case tracking number: 2016T1

Chronology

Broad period: POST MEDIEVAL

Period from: MEDIEVAL

Period to: POST MEDIEVAL

Date from: Circa AD 1450

Date to: Circa AD 1700

Dimensions and weight

Quantity: 1

Length: 50 mm

Width: 26 mm

Weight: 7.45 g

Discovery dates

Date(s) of discovery: Thursday 17th December 2015 - Thursday 17th December 2015
