

NECKLACE

Unique ID: BM-81D696

Object type certainty: Certain

Workflow status: Published

A gold necklace clasp, dating to the Roman period. The clasp comprises a tapering piece of circular-section gold wire. At one end, the wire tapers and has been bent to form a hook. At the other, the wire has been bent around itself to form two circular loopss and is secured by wrapping the wire around itself four times. A further fragmentary circular-section gold wire chain is the threaded through the loop. The clasp measures 13mm in length and a maximum of 4mm in width at the loop end. The clasp weighs 0.32 grams.
