# **BROOCH**

Unique ID: PUBLIC-609F88

Object type certainty: Certain

Workflow status: Awaiting validation

A fragment of a copper-alloy Iron Age brooch probably of La Tene I type, dating from 300-150 BC. The remains of the brooch consist of a highly arched body in profile, with a D-shaped cross-section at its centre. The spring head, foot and pin are missing. The brooch has an overall dark green colour with a corroded and pitted surface which is laminated in places.. It measures 33.7 mm long, 7.6 mm maximum width, 5.7 mm thick (at centre) and weighs 6.3 grams.

A similar fragment of this type can be seen in this record **KENT-F8C661** 

#### **Subsequent actions**

Subsequent action after recording: Returned to finder

### Chronology

Broad period: IRON AGE Period from: IRON AGE Period to: IRON AGE Date from: Circa 300 BC Date to: Circa 150 BC

### **Dimensions and weight**

Quantity: 1 Length: 33.7 mm Width: 7.6 mm Thickness: 5.7 mm Weight: 6.3 g

### **Discovery dates**

Date(s) of discovery: Sunday 9th October 2016

#### **Personal details**

This information is restricted for your access level.

#### **Materials and construction**

Primary material: Copper alloy Manufacture method: Cast Completeness: Incomplete

# **Spatial metadata**

Region: West Midlands (European Region)

County or Unitary authority: <a href="County of Herefordshire">County of Herefordshire</a> (Unitary Authority)

District: County of Herefordshire (Unitary Authority)

To be known as: Leintwardine

## **Spatial coordinates**

Grid reference source: From finder

Unmasked grid reference accurate to a 0.01 metre square.

# **Discovery metadata**

Method of discovery: Metal detector

Discovery circumstances: metal detecting Find

General landuse: Cultivated land

Specific landuse: Operations to a depth greater than 0.25m
