

BUTTON

Unique ID: PUBLIC-EE6E51

Object type certainty: Certain

Workflow status: Awaiting validation

Modern copper alloy, cast livery button. The button's face is slightly convex with a concave reverse. It was most likely originally gilded or silvered. The front has a raised design of a crown with an erect arm holding some kind of object, however it is too worn to make out any kind of detail. On the back is the makers' name: HAMMOND TURNER & SONS, between an inner and outer pellet border and a loop in the centre which would attach the button to, presumably, some kind of garment.

It hasn't been possible to identify the crest, however the backmark was used by the makers from 1823 to 1865.

Chronology

Broad period: MODERN

Period from: MODERN

Period to: MODERN

Date from: Circa AD 1823

Date to: Circa AD 1865

Dimensions and weight

Quantity: 1

Weight: 8.17 g

Diameter: 26.4 mm

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy

Manufacture method: Cast

Completeness: Complete

Spatial metadata

Region: [East Midlands](#) (European Region)

County or Unitary authority: [Lincolnshire](#) (County)

District: [West Lindsey](#) (District)

To be known as: Near Caistor

Spatial coordinates

Grid reference source: GPS (from the finder)

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land
