

TOKEN

Unique ID: DEV-6C09A1

Object type certainty: Certain

Workflow status: Awaiting validation

A Post Medieval lead alloy token of Powell type 2. The item is circular in shape and both front and reverse faces are flat. The front face has a raised border of pellets and a B at the centre. The reverse is plain. The token is bent over and there is a slight fracture at 11 O'clock, which is probably the result of post depositional damage. Diameter: 26 mm.

Lead tokens are hard to date as they were usually produced locally for a wide range of purposes, a broadly Post Medieval date is suggested because of the use of a letter in the design.

Notes:

This record was left unfinished and has been promoted in the hope it may be of use to researchers.

Class: Powell type 2
