

HARNESS FITTING

Unique ID: BH-987059

Object type certainty: Certain

Workflow status: Awaiting validation

A copper-alloy stud, probably a harness fitting dating to the Roman period. The head is lentoidal in plan and convex in section. There is a small perforation in the head, which appears to be accidental damage. From the underside of the head, there extends a circular-section stem which terminates in a flat, circular end plate. The head measures 30mm in length, 12mm in width and the stud measures 12mm in thickness. It weighs 5g.

Notes:

2016 SF 22
