

BROOCH

Unique ID: PUBLIC-8BAB23

Object type certainty: Certain

Workflow status: Awaiting validation

An incomplete, copper alloy, Roman T-shaped brooch. The wings are cylindrical and house a corroded axis bar (perhaps iron). A fragment of the pin still remains and has been bent over time. The bow is relatively straight in cross section (which could be a result of damage over time) and wide at the top before tapering to sharply to a pointed foot. There appears to be a raised decorative pattern of the bow, in an almost elongated tear drop shape which mirrors the shape of the bow. other than this, the brooch is relatively undecorated.

Class: T-shaped

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: ROMAN

Period from: ROMAN

Period to: ROMAN

Date from: Circa AD 43

Date to: Circa AD 200

Dimensions and weight

Quantity: 1

Length: 36.67 mm

Width: 23.49 mm

Thickness: 9.58 mm

Weight: 5.27 g

Personal details

This information is restricted for your access level.

Materials and construction

Primary material: Copper alloy

Manufacture method: Cast

Completeness: Incomplete
