

SCRAPER (TOOL)

Unique ID: DOR-C918FF

Object type certainty: Certain

Workflow status: Awaiting validation

A scraper made on a sub-oval, horseshoe shaped secondary flake of dark grey flint. The flint is semi-translucent with a mid-gloss patina and thick nodular cortex remains on the whole of the flat striking platform. The dorsal face shows central broad flake removal scars and short, scaled, semi-abrupt retouch around the distal end. The ventral face has a prominent bulb of percussion indicating probable use of a hard hammer such as a hammerstone.

Date: Early Bronze Age - 2350 to 1600 BC

Dimensions: 29.9mm x 34.7mm x 9.5mm

Weight: 12g

Class: Horseshoe Scraper

Subsequent actions

Subsequent action after recording: Returned to finder
