

KNIFE

Unique ID: NLM-B7BB42

Object type certainty: Certain

Workflow status: Awaiting validation

Pale grey-buff flint knife. Flake with broad parallel flakes struck from its dorsal side and with a bulb on the ventral side. Misty white patina suggests the flake was then exposed for a period to a calcareous environment. The patina is interrupted along one long edge by short abrupt retouch executed from the dorsal aspect. Chips on the opposite edge probably arise from fortuitous impacts. The Neolithic could accommodate both primary and secondary working. Suggested date: Neolithic, 4000-2350 BC.

Length: 41.1mm, Width: 20.9mm, Thickness: 5.7mm, Weight: 4.83gms

Evidence of reuse: Interruption of patina by retouch

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: NEOLITHIC

Period from: MESOLITHIC

Period to: NEOLITHIC

Date from: Circa 4000 BC

Date to: Circa 2350 BC

Period of reuse: NEOLITHIC

Dimensions and weight

Quantity: 1

Length: 41.1 mm

Width: 20.9 mm

Thickness: 5.7 mm

Weight: 4.83 g

Discovery dates

Date(s) of discovery: Tuesday 21st March 2017

Personal details

This information is restricted for your access level.

Other reference numbers

Other reference: NLM35733

Materials and construction

Primary material: Flint

Manufacture method: Knapped/flaked

Completeness: Complete

Spatial metadata

Region: [East Midlands](#) (European Region)

County or Unitary authority: [Lincolnshire](#) (County)

District: [East Lindsey](#) (District)

To be known as: Binbrook

Spatial coordinates

Grid reference source: From finder

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land
