

SPOON

Unique ID: DEV-B1A61B

Object type certainty: Certain

Workflow status: Awaiting validation

A Post-Medieval copper alloy trifold spoon handle terminal, probably dating to c. AD 1650-1720. The spoon handle is flat and plain, terminating in a worn break at the worn end and flaring outwards into a tri-lobed trifold terminal at the other, there is a central drilled aperture below the central lobe, probably for suspension.

Dimensions: length 84.2mm; width 24.3mm; thickness 1.8mm; weight 8.77g.

Egan (2005: 118, no. 578) publishes an unstratified trifold spoon featuring counterfeit hallmarks dating the spoon to the mid-17th century at the earliest. Homer (1975: 43) suggests that this style of spoon first appeared soon after 1660 and went out of fashion by c. 1700. cf. GLO-BD726C on this database.

Class: Trifold
