

# THIMBLE

**Unique ID:** WMID-E09C07

Object type certainty: Certain

Workflow status: Awaiting validation

A complete although flattened silver sewing thimble of Post-Medieval date (c. AD 1750-1900).

The body of the outer face of this thimble has machine-made horizontal lines of circular indentations. The crown has concentric rings of machine-made circular indentations. The lower edge of the thimble has a raised circumferential band. Above this is a flat area without indentations that has a raised circumferential collar.

There are parallels recorded on the PAS database including BERK-91DC75 discovered in Oxfordshire and IOW-7B8AEA from the Isle of Wight. This object can be dated to less than 300 years old. As it was a casual loss and not buried with the intention of recovery, it therefore does not qualify as treasure.

The thimble measures 25.1 mm in height, 25.1 mm in width, 3.6 mm in thickness in its flattened form and weighs 3.9 grams.

**Class:** closed

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Period to: MODERN

Date from: Circa AD 1750

Date to: Circa AD 1900

## Dimensions and weight

Quantity: 1

Height: 25.1 mm

Width: 25.1 mm

Thickness: 3.6 mm

Weight: 3.9 g

## Personal details

This information is restricted for your access level.

## Materials and construction

Primary material: Silver

Completeness: Complete
