

SCRAPER (TOOL)

Unique ID: NLM-6021CB

Object type certainty: Certain

Workflow status: Awaiting validation

Flint with cortex, scraper. A small thick chunk with broad flakes removed from its dorsal side by hard hammer strike and with a flat ventral surface. The thickest end of the chunk has received short abrupt retouch executed from the dorsal aspect, producing a broad working face which was subsequently lightly battered. A dense creamy patina overall suggests the object has endured prolonged exposure to a calcareous environment after its deposition. Suggested date: Early Bronze Age, 2350-1600 BC.

Length: 38.6mm, Width: 35.7mm, Thickness: 21.2mm, Weight: 30.65gms

Subsequent actions

Subsequent action after recording: Returned to finder
