

# MULLER

**Unique ID:** NLM-74889D

Object type certainty: Possibly

Workflow status: Awaiting validation

Grey-green stone possible muller. A rounded possibly water-rolled pebble with a dull and speckled surface appearance, possibly with worn and in one case slightly concave faces, well-adapted to hold in the hand. This object was recovered as distinctively different from the local stones, and as such is probably a manuport [i.e. brought to the site by human agency]. Such stones might be retrieved as glacial erratics, and lent themselves to uses as rubbers, grinders and burnishers. They are noted particularly from contexts between the Iron Age and the Early Medieval period, though as a field find this piece lacks any contextual association. Suggested date: Unknown, Iron Age to Early Medieval, 800BC-AD1000.

Diameter: 53mm, Weight: 187.48gms

## Subsequent actions

Subsequent action after recording: Returned to finder

## Chronology

Broad period: UNKNOWN

Period from: IRON AGE

Period to: EARLY MEDIEVAL

Date from: Circa 800 BC

Date to: Circa AD 1000

## Dimensions and weight

Quantity: 1

Weight: 187.48 g

Diameter: 53 mm

## Discovery dates

Date(s) of discovery: Tuesday 3rd July 2018

## Personal details

This information is restricted for your access level.

## Other reference numbers

Other reference: NLM39813

## Materials and construction

Primary material: Stone

Manufacture method: Ground/polished

Completeness: Complete

## Spatial metadata

Region: [Yorkshire and the Humber](#) (European Region)

County or Unitary authority: [North Lincolnshire](#) (Unitary Authority)

District: [North Lincolnshire](#) (Unitary Authority)

To be known as: Low Burnham

## Spatial coordinates

Grid reference source: Centred on field

Unmasked grid reference accurate to a 0.01 metre square.

## Discovery metadata

Method of discovery: Fieldwalking

General landuse: Cultivated land
