

VESSEL

Unique ID: DOR-876D55

Object type certainty: Certain

Workflow status: Awaiting validation

A fragment of a cast copper-alloy vessel, probably a skillet or cauldron, of Medieval to Post-Medieval date, circa 1200-1700. The rim is beaded internally and there are file markings on the internal surface. The shaping of the lower section of the fragment suggests that the vessel may have had an everted rim. The object is pitted, with a blackened surface suggesting sooting. The vessel fragment is 60.91mm in length, 37.67mm in width and 4.36mm in thickness. It weighs 46.91g.
