

SHOT

Unique ID: SWYOR-C952B8

Object type certainty: Possibly

Workflow status: Awaiting validation

A possible stone cannon ball of Late Medieval to Post Medieval date. It is sub-spherical and made from what appears to be igneous rock, perhaps granite with possible feldspar seams. It is 50.1mm in diameter and weighs 145g. At just under 2 inches diameter, this ball is the right size for a Falconet cannon. Falconets were invented in the late 15th century and were used throughout the 16th and 17th centuries.

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: POST MEDIEVAL

Period from: MEDIEVAL

Period to: POST MEDIEVAL

Date from: Circa AD 1450

Date to: Circa AD 1700

Dimensions and weight

Quantity: 1

Weight: 145 g

Diameter: 50.1 mm

Discovery dates

Date(s) of discovery: Friday 1st January 2010 - Saturday 31st December 2011
