A fragment of a copper-alloy medieval/ early post-medieval (c.1250-1600) handle from a chafing dish, consisting of the attachment lug only. The lug is tear-drop shaped with a rectangular cross-section and a central piercing 6.0mm in diameter. The pointed end of the tear-drop is truncated and instead has a ridge moulding to the sides, which gives a square cross-section at this point c.8.0 x 8.5mm. At the centre of this is a short, squahsed circular projection c.7mm in diameter and 1.5mm in length.

The object has a green-brown coloured patina and measures 21.1mm in length, 13.5mm in max.width, 8.4mm in max.thickness and weighs 10.31g.
