

SCRAPER (TOOL)

Unique ID: NLM-87B648

Object type certainty: Certain

Workflow status: Awaiting validation

Dark grey, appearing brown under transmitted light, flint with cortex; notched scraper. Flake with a broad flake trimmed from its dorsal side by hard hammer strike, and with a bulb at the narrower end of a markedly concave ventral surface. Very short abrupt retouch executed from the ventral aspect follows part of one edge to form a notch. The appearance of similar retouch executed from the dorsal aspect is misleading, and arises from adventitious edge-on impacts. The finder kindly cites PUBLIC-7040A5 as a parallel. Suggested date: Early Bronze Age, 2350-1600 BC

Length: 41.1mm, Width: 27mm, Thickness: 11.1mm, Weight: 10.17gms

Class: Hollow
