WEIGHT

Unique ID: NLM-881628

Object type certainty: Possibly

Workflow status: Awaiting validation

Lead possible weight. Cast cylindrical or barrel-shaped object with a large round central aperture of diameter 6mm; patinated. If used as a weight, this would presumably be on either a line or the selvedge of a net - the size of hole would admit the latter. The oblate form is similar to that of larger and later weights used by fishermen, while the mass is close to one quarter of an averdepois ounce. Suggested date: Post-Medieval, 1500-1700

Length: 13.6mm, Diameter: 11.7mm, Weight: 7.60gms

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: POST MEDIEVAL Period from: POST MEDIEVAL Period to: POST MEDIEVAL Date from: Circa AD 1500 Date to: Circa AD 1700

Dimensions and weight

Quantity: 1 Length: 13.6 mm Weight: 7.6 g Diameter: 11.7 mm

Discovery dates

Date(s) of discovery: Tuesday 6th November 2018

Personal details
