## BROOCH

Unique ID: WILT-3CEFB2
Object type certainty: Certain
Workflow status: Awaiting validation

A copper alloy annular brooch, probably dating to c. AD 1200-1400. The brooch consists of a circular frame with a constriction to hold a lost pin. On the axis perpendicular to the constriction, the frame expands into a projecting collet on one side, and an elongated knop with central engraved groove on the opposite side. The frame is plano-convex in cross section.
