

LITHIC IMPLEMENT

Unique ID: LEIC-5A0E16

Object type certainty: Certain

Workflow status: Awaiting validation

A worked lithic implement, possibly a scraper, produced from dark brown flint with two remaining areas of light brown cortication. The object is curved longitudinally, is triangular in cross section and tapers from a maximum width of 23mm to 13mm. All three edges and the blunt tip show short, scaled retouch. The object is in good condition, is 94mm long, 23mm wide, 15mm thick and weighs 35.47g.

Subsequent actions

Current location of find: With finder

Subsequent action after recording: Returned to finder

Chronology

Broad period: MESOLITHIC

Period from: MESOLITHIC

Period to: NEOLITHIC

Dimensions and weight

Quantity: 1

Length: 94 mm

Width: 23 mm

Thickness: 15 mm

Weight: 35.47 g

Discovery dates

Date(s) of discovery: Sunday 24th February 2019

Personal details

Recorded by: Dr Phil Harding

Identified by: Dr Phil Harding

Other reference numbers

Other reference: 2772

Materials and construction

Primary material: Flint

Manufacture method: Knapped/flaked

Completeness: Complete

Spatial metadata

Region: [East Midlands](#) (European Region)
County or Unitary authority: [Leicestershire](#) (County)
District: [Melton](#) (District)
Parish or ward: [Frisby on the Wreake](#) (Civil Parish)

Spatial coordinates

4 Figure: SK6917
Four figure Latitude: 52.7462272
Four figure longitude: -0.97928098
1:25K map: SK6917

Grid reference source: GPS (from the finder)
Unmasked grid reference accurate to a 1 metre square.

Discovery metadata

Method of discovery: Chance find during metal detecting
Discovery circumstances: Whilst searching with a metal detector
Current location: With finder
General landuse: Cultivated land
Specific landuse: Operations to a depth greater than 0.25m
